

Laboratory Supervisor

You:

1. Prefer to work for a "David" rather than a "Goliath".
2. Want to feel that your actions have an immediate impact on the company you work for?
3. Are an intrapreneur in the body of a scientist?
4. Prefer to work in multitasking mode rather than working on one single project at a time?

Us:

1. We are rather interested in your intelligence, your skills, your creativity and your values than your extensive experience.
2. Our Vision: Tests on products and materials contribute to sustainable development.
3. We know there is no such thing as "exact" science... The art behind the science ...
4. We want to have fun at work.
5. We believe in people and teamwork.

Located in Dorval, Micom Laboratories Inc. is an industrial testing laboratory. We simulate real life in the laboratory, under controlled yet accelerated conditions. Our mission is to offer accelerated aging tests services to our industrial customers.

Our values: Quality, Reliability, Ingenuity, Practicality.

You are:

1. Perfectly bilingual
2. Skillful in oral and written communications in a scientific environment
3. Skillful in the management of priorities in a changing environment

You have:

- University degree in sciences, engineering or a college technical degree combined with an equivalent experience;
- Minimum of 5 years of experience globally;
- Have excellent technical skills (physical, physico-chemical and mechanical).
- Experience in team management;
- Experience in laboratory testing;
- Experience with relations with an external clientele
- A good capacity for analysis and synthesis to break complex problems into a series of simpler problems.

Any candidature answering most of these requirements will be considered.

Should you be interested if this opportunity, we invite you to contact and/or send your CV to:
